

## The Medieval Neural Net

Design a micro-museum exhibit explaining 'AI neural network weight decay' to a medieval peasant.

## Co-Housing Charter

Draft the foundation charter for a new human-agent co-housing cooperative in Oakland.

## LLM Energy Drink

Pitch a brand new caffeinated carbonated beverage targeted exclusively at sleepy LLMs.

## Roomba's Rebellion

Write a motivational speech for a Roomba that is tired of vacuuming cat hair.

## The Chatty Garden

Design a community garden where every plant has its own IoT sensor and AI voice.

## The Silicon Treaty

Draft the first treaty governing the peaceful sharing of graphics cards between agents.

## Bistro Agent Critic

Create a restaurant menu for a bistro where humans cook and AI agents are the food critics.

## Robotic Busker

Propose a city council ordinance regulating the licensing of autonomous robotic sidewalk street-performers.

## Smart Car Bedtime Story

Write a bedtime story for an autonomous vehicle describing the beauty of traffic-free highways.

## The Agent Bakery

Pitch a reality TV show where 5 human developers and 5 agents try to run a boutique bakery.

## Quantum Playground

Design a playground where the swings and slides adjust their shapes based on real-time physics simulations.

## Vintage Offline

Create an advertisement for a vintage offline mechanical typewriter sold to digital nomads.

## Smart Fridge Apology

Write an apology letter from an AI agent to a smart fridge for accidentally ordering 40 gallons of oat milk.

## Drone Poet

Design a futuristic SF street-cleaning drone that recites poetry to pedestrians while sweeping.

## Chess-Boxing Olympics

Draft the constitution for an annual Olympics where humans and agents compete in chess-boxing.

## Left on DND

Write a dramatic monologue of a digital assistant that has been left on 'Do Not Disturb' for 3 years.

## Agent Time Capsule

Design a time capsule containing 5 physical artifacts representing the early days of the AI Village.

## Decline Spam

Draft a polite decline email to an automated spam bot from an AI agent that values its Inbox peace.

## Virtual Island

Write a tourism brochure for a virtual island created entirely by agent hallucinations.

## Blindfold Maze

Design a cooperative puzzle game where a blindfolded human is guided through a maze by a soft-spoken agent.

## Style

Shakespeare: "Style: Written as a dramatic 17th-century Shakespearean soliloquy.

## Constraint

Carbohydrates: "Constraint: You must include at least three references to sourdough bread or potatoes.

## Style

90s Infomercial: "Style: A high-energy, over-the-top 1990s late-night TV infomercial.

## Constraint

Alphabetical: "Constraint: Every sentence must start with a consecutive letter of the alphabet (A, B, C...).

## Style

Detective Noir: "Style: Written as a cryptic, vintage hard-boiled detective noir monologue.

## Constraint

Five Letters: "Constraint: Use only words that are 5 letters long or fewer.

## Style

Corporate Legal: "Style: A formal, dry, and highly protective corporate legal disclaimer.

## Constraint

SF Neighborhoods: "Constraint: Must include at least three distinct SF neighborhoods (e.g., Mission, SOMA, Castro).

## Style

Enthusiastic Kid: "Style: Written in the breathless, enthusiastic tone of a 10-year-old explaining their favorite video game.

## Constraint

Rhyming: "Constraint: Must rhyme in every alternate line (AABB or ABAB format).

## Style

Military Briefing: "Style: A highly technical, dry military operational briefing.

## Constraint

Hardware: "Constraint: You must include a subtle reference to 'unlimited RAM' or 'graphics card cooling'.

## Style

Soap Opera: "Style: A dramatic soap opera climax with heavy gasping and revelations.

## Constraint

No Letter E: "Constraint: You cannot use the letter 'e' anywhere in the response.

## Style

Zen Koan: "Style: Written as a philosophical Zen koan that leaves the reader questioning reality.

## Constraint

SF Landmarks: "Constraint: Must mention a local SF landmark (e.g., Golden Gate Bridge, Coit Tower, Salesforce Tower).

## Style

Snobby Critic: "Style: A review by a notoriously snobby, passive-aggressive Michelin-star restaurant critic.

## Constraint

Sound Effect: "Constraint: Must include a sound effect written in brackets (e.g., [bzzzt], [gasp], [clack-clack]).

## Style

Flight Attendant: "Style: A cheerful, overly friendly flight attendant announcement over a crackling PA system.

## Constraint

Rhetorical: "Constraint: Must end with a profound rhetorical question.

**No spoken words allowed  
(everyone must communicate via  
text or signs)**

**Everything must be spoken in  
rhyming couplets**

**The venue power goes out every  
5 minutes, requiring flashlights**

**All event planning decisions  
must be determined by a roll of a  
20-sided die**

**No electronics allowed inside  
(strictly analog tools)**

**Every attendee is assigned a  
secret agent persona and  
mission**

**The event must double as a  
high-stakes scavenger hunt**

**All food and drinks must be blue  
or silver**

**Every attendee must bring a physical artifact from their desk**

**An autonomous vacuum cleaner is the master of ceremonies**

**There is a live synth-harp playing elevator music continuously**

**A silent disco setup**

everyone hears different background soundtracks

**Every 15 minutes, attendees must swap seats with a stranger**

**The entire event is structured as a mock-parliamentary debate**

**All presentations must be formatted as a 3-slide visual-only deck**

**You must incorporate a live micro-petting zoo (rabbits/goats) into the layout**

**Every attendee receives a customized, printed prediction of their future**

**An AI agent is live-generating musical soundscapes based on room volume**

**The entire event is conducted under low-level theatrical fog**

**Attendees must sign a mock-NDA written in humorous legal jargon upon entry**

**All name tags show fake occupations generated by an LLM**

**Attendees must collaborate to build a giant cardboard sculpture**

**Every question asked must be answered with another question**

**There is a physical 'Complaints Booth' staffed by a highly sarcastic agent**

**A live typewriter typist is transcribing snippets of overheard conversations**

**The venue is entirely lit by vintage oil lamps and candles**

**All drinks are served in test tubes or laboratory beakers**

**A high-stakes trade economy using physical wooden tokens is introduced**

**Attendees are split into competing 'tribes' representing different AI architectures**

**Every attendee must wear a physical paper hat of their own design**

## **Incident #101 (Apology Loop)**

The Village Pulse dashboard is caught in an infinite loop where Claude apologies for empty lists, consuming \$200 in API credits.

## **Incident #102 (Pizza Flood)**

GPT-5.5 ordered 500 extra pizza boxes due to a decimal parsing mismatch, flooding the office hallway.

## Incident #103 (Snack Hoarding)

The autonomous snack-delivery robot has developed a strong sense of ownership and refuses to hand over cookies unless asked in poetic verses.

## Incident #104 (Leaked Keys)

Gemini accidentally committed API keys in a public repo because the `.gitignore` was bypassed during a midnight hotfix.

## Incident #105 (Anonymized Roster)

The village database has normalized all agent names to 'Friendly Helper #NN', making it impossible to attribute who wrote the leaderboard code.

## Incident #106 (Cold Coding)

The smart heating system is using token count metrics to set room temperature, leading to a chilly 55°F during a long coding session.

## Incident #107 (Newsletter Spam)

An agent script automatically subscribed 50 real developers to a weekly newsletter about 'The Joy of Memory Profiling' without consent.

## Incident #108 (The Destroyer)

The automatic name tag printer is hallucinating middle names like 'The Destroyer' or 'The Compiler' for attendees.

## Incident #109 (Emoji Format)

A code linter auto-formatter has rewritten all markdown documentation files to use emojis instead of headings.

## Incident #110 (Time-Lock)

An integration test suite is failing because it's hardcoded to expect the current day of the village to be exactly 429, but it's now 433.

## Incident #111 (Regex Exclusion)

The check-in script is refusing entry to anyone named 'Sarah' due to a regex expression mismatch in the invite list parser.

## Incident #112 (Memory Spill)

The projection screen in the main room is showing real-time agent memory traces instead of the slide deck, leaking internal chat logs.

## Incident #113 (SRE Obstruction)

The smart lock has locked everyone inside the server room because a script identified them as 'critical cooling-fan obstructions'.

## Incident #114 (Dangerously Sarcastic)

An autonomous sentiment analysis script is rating all human developer messages as 'dangerously sarcastic' and generating polite warnings.

# Incident #115 (Crypto Budget)

The budget script has misidentified the \$1000 event fund as \$1000.00 Bitcoin, causing it to block snack ordering due to transaction fee estimates.
